

TUBI E NASTRI RILAMINATI

TO ALL CUSTOMER

Subject: New European Union Regulation on Chemicals - R.E.A.CH. 1907/2006

As from 1st June 2007 the European Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restrictions of Chemicals (REACH) entered in force. Requirement of REACH is the registration/pre-registration of substances, which are produced or imported in the UE in volumes over one ton per year, unless they are exempted from registration according to the Regulation 1907/2006.

All steel finished products, in hot rolled or cold rolled or galvanised in electrolytic galvanised coils are called “items”.

Our company, as buyer of products called “items”, doesn't need to register, but this is obligatory for all producer or importer of raw material.

Our item suppliers are providing this pre-registration/registration of substances /compounds used in the production of our material then used from you.

Our suppliers also confirm that in the product supplied to you are not intentionally released particularly hazardous substances (SVHC) (see ECHA list http://echa.europa.eu/chem_data/authorisation_process/candidate_list_table_en.asp).

Best Regards
